Brazil

A screenshot of a web browser displaying the 'Good Free Photos' website. The browser's address bar shows 'www.goodfreephotos.com'. The website's header includes a navigation menu with links like 'Bonjour', 'S-Foc', 'Ent', 'RSG', 'WS', 'Best', 'G', 'Soc', 'Apps', 'lets', 'News', and 'Save'. Below the header, a large orange-bordered box contains the text: 'I press the Hyper Key so a palette of choices appears via Keyboard Maestro'. The website's main content area features a grid of photo categories: 'Last 100 Images', 'Featured', 'Travel Blog', 'News', 'Tutorials', 'Submit Photo', 'Facebook', 'Google+', and 'Instagram'. A section titled 'Good Free Photos' contains the heading 'Free Photos (Public Domain Photos), Clipart, images, and Vectors' and a description: 'A large Public Domain photo repository with high resolution free photos and vectors. 11700 free and public domain photos, images, clipart, pics and vectors and counting.' Below this is a search bar labeled 'Search Free Photos:' and a 'Search gallery' button. The bottom of the page shows a grid of various landscape and nature photos. On the left side of the browser window, a 'Safari [Palette]' is open, displaying a list of actions categorized under 'APP', 'DEV', 'PROCESSING', 'IMPROVE', 'WEBSITES', and 'SHARE'. The 'APP' category is currently selected, showing actions like '4. Hide Safari Chrome', 'B. Show/Hide Bookmarks', '2. Resize (1 Tab, No Bookmarks)', '3. Resize (1 Tab, Bookmarks)', 'A. Open Safari URL in Chrome', and '1. Select 1st Search Box'.

```

The screenshot displays the Keyboard Maestro application window. On the left sidebar, under "Select Application:", several applications are listed: Global (selected), Dash, Finder, Firefox, Google Chrome, MailMate, Path Finder, Safari, and Vivaldi. Each has a corresponding icon. At the bottom of the sidebar, there are controls for adding (+) or removing (-) items, a dropdown menu currently set to "App Specific", a gear icon for settings, and a "Presets" section with a "Default" preset and up/down arrow icons. Below the presets is a small table with two columns: "New" (containing "Import") and "Remove" (containing "Export"). The main area on the right is a table with three columns: "Shortcut", "Assigned Action", and "Enabled". The first row shows the shortcut "\^M" assigned to "Mission Control", which is enabled (indicated by a blue checkmark). The rest of the table consists of empty rows with alternating light gray and white background colors.

Easy OCR of short passages of text

picatext

English

Press    

The Features

Did you ever have to typewrite a text from an image? Maybe someone sent you an e-mail with a scanned document and now you have to retype every single sentence. With picatext you can get rid of that! Just choose your image or select a region on the screen and picatext will do the rest for you.

File extraction

With `picatext` you can open nearly any image format from your file system and extract the text from it.

Screen extraction

Open up picatext, drag a rectangle around a part of your screen and get the included text of it immediately.

Languages

picatext supports character recognition for over 40 different languages. Just select the appropriate language and get your text in no time.

Keyboard Maestro

Create keyboard macro shortcuts that can automate just about anything

Launch apps • Click the mouse anywhere • Execute scripts • Insert text • Position windows • Flow control with loops & conditionals • Press buttons • Select menus • Open files & URLs • Move, copy, rename, & trash files • Create & work with unlimited clipboards • Save & paste clipboard history • Control iTunes • Display notifications • Find & manipulate images • Switch between apps

Trigger macros based on almost anything

Hot keys • Click on macro palette • Status menulet •
Typed strings • When an app launches, quits, activates, or
deactivates • System clipboard changes • Keyboard
Maestro engine launches • Window changes focus • Log in
to your Mac • Hard drive is mounted or unmounted •
Periodically while logged in • System goes to or wakes
from sleep • Time of day • USB device is attached or
detached • Connects to, or disconnects from a wireless
network • Triggered from iPhone, iPad, or iPod Touch •
Scripts

One of the most complex but also most powerful apps
you can use on your Mac

Triggers

- Macros can be triggered by one or more Macro Triggers using any number of the following:
 - Hot Key trigger – when you press, hold, release or multi-tap a key.
 - Macro Palette trigger – with a click on a context sensitive Macro Palette.
 - Status Menu trigger – by selecting from a global system status menu.
 - Typed String trigger – type a string of keys.
 - Application trigger – on launch, quit, activate, deactivate, or periodically while an application is running or active.
 - Clipboard trigger – when the system clipboard changes.
 - Engine Launch trigger – when the Keyboard Maestro engine launches.
 - Focussed Window trigger – when the front/focussed window changes.
 - Login trigger – when you log in to your Mac.
 - MIDI trigger – when a MIDI note is pressed or released.
 - Mounted Volume trigger – when a volume is mounted or unmounted.
 - Periodic trigger – periodically while logged in.
 - Public Web trigger – over the Internet, explicitly to the public, or via authenticated log in.
 - Sleep trigger – when the system goes to sleep.
 - Time trigger – at a particular time of day.
 - USB Device Key trigger – when you press, hold, release or multi-tap any HID (Human Interface Device) device key.
 - USB Device trigger – when a USB device is attached or detached.
 - Wake trigger – when the system wakes from sleep.
 - Wireless Network trigger – when your Mac connects or disconnects to/from a wireless network.
 - iPhone trigger – from your iPhone, iPod touch or iPad.
 - Script trigger – from an AppleScript or other script.

Changelog

2021-03-31 2.0: Created presentation using slides from the original Getting More From Your Mac

Changelog

2021-03-23 1.8: Added how to copy & move files in Finder with key commands; added *Installing Software* section

2020-06-23 1.7: Added section *Get Info, Get Summary Info, & Show Inspector*; add info re: macOS 11 Big Sur; added slide listing all Apple operating systems

2019-08-16 1.6: Added Catalina for 10.15; added note that --- is not an em dash

Changelog

2017-09-20 1.5: Combined naming charts in *History*; fixed minor formatting issues; added Thank You, Scott (⌘⇧/) to *Basic Key Commands*; added Terminal commands for disclosure buttons; added Show the Finder location of a file from a dialog box; added screenshot of Finder sidebar; added command for QuickLook slideshow; added Special Info in Finder; updated Mac prices for 2019; fixed QuickLook slides

Changelog

2018-08-19 1.4: Added *File Info & Actions* section under Finder with Contextual Menus, Get Info, & Inspector; added HoudahSpot under Spotlight; added commands to open all disclosure boxes & Show Details for printing; added *File Management* section with New Folder with Selection; applied Granneman 1.4 theme; fixed minor formatting issues; added Sidebar under Components; more info on built-in security; added ⌘⌘⌘ in addition to triple-click for data detectors

Changelog

2017-09-06 1.3: Fixed formatting; in *History* & added High Sierra; in *Key Commands*, added Alfred for clipboard; added slides re: holding down ⌘ in *Open & Save*; made deleting clearer in *Movement*; added slide about drop shadows in screenshots; added huge amount about Path Finder; added slides re: Finder renaming files; added lots of examples of Spotlight searches (RIP David Bowie); added New File Menu; added **duration:**, **date:**, & much more to Spotlight

Changelog

2016-10-11 1.2: Changed Lazy is Good image; spread Automation throughout the deck; renamed *Things You're Not Doing Right* to *Finder* & added lots more; added *Spotlight* section; changed *menulets* to *status menus*; added *Quick Look*

2016-10-07 1.1: Changed theme; fixed formatting; added & changed a lot; new stuff on Finder, Printing, Key Commands, System Preferences, Tabs; added *Computer Rules* section; lots of fixes

2016-03-13 1.0: First version
