N.S.A. Suspect Is a Hoarder. But a Leaker? Investigators Aren't Sure.

By SCOTT SHANE and DAVID E. SANGER OCT. 6, 2016

WASHINGTON — On a half-dozen occasions in the last three years, top-secret information has leaked from the National Security Agency and appeared on the web. Government analysts concluded with alarm that the documents, including intercepted communications from Europe and Japan and the computer code for the N.S.A.'s hacking tools, had not come from the huge collection taken by Edward J. Snowden.

That meant there was at least one more leaker still at large, and when F.B.I. agents found in August that a former agency contractor had been taking home top-secret material, they thought they might have the culprit.

Now they are not so sure.

Harold T. Martin III, the contractor arrested by the F.B.I. on Aug. 27, brazenly violated basic security rules, taking home a staggering quantity of highly classified material. He had been doing this undetected, agency officials were chagrined to learn, since the late 1990s. But, officials say, they have not been able to definitively connect Mr. Martin, 51, a Navy veteran, to the leaked documents.

Elizabeth Martin, his former wife, a former Maryland police officer who runs a polygraph firm in Australia, said that although she had not seen him since 2009, she would be shocked if he had intentionally passed on or published classified material.

"He was one of the most patriotic people I knew," Ms. Martin said in a telephone

re.

VipRiser

I get a lot of receipts in email, & I want to quickly print them as PDFs to a folder that holds them all until I sort through them at tax time

VipRiser is an “extensible virtual PDF printer” that allows you to print a PDF using a customized process

default destination: Ask User
 Folder
 DropBox
 iTunes
 Kindle
 RSS Server
 Plugin: No Value

add destination plugin - Crop / Split / Merge ...

add filter - CMYK color / B&W / PDF-X3 ...

destination for screenshots: default destination

Folder

DropBox

iTunes

Kindle

RSS Server

Settings

Copy files into Folder:  Printed PDFs

* If the folder is not accessible when the printing takes place (e.g. is located on an external drive which has been disconnected), the VipRiser will attempt to complete the processing as soon as the folder becomes available.

Best Printing
Trick Ever

CSS

Global CSS settings, fundamental HTML elements styled and enhanced with extensible classes, and an advanced grid system.

Overview

Get the lowdown on the key pieces of Bootstrap's infrastructure, including our approach to better, faster, stronger web development.

HTML5 doctype

Bootstrap uses the latest HTML5 elements and CSS properties for responsive use of the HTML5 design. Includes a list of all elements.

```
<!doctype html>  
<html lang="en">  
<head>  
</head>  
</html>
```

Mobile first

With Bootstrap 3, we added several mobile-friendly styles for the benefit of the responsive. Bootstrap 3 was designed to be mobile first, meaning that the styles are designed to be used on a small screen and then scaled up for larger screens.

To ensure proper styling on a small screen, add the `no-js` class to your `<html>`.

```
<html class="no-js">  
</html>
```

To use media queries capabilities of mobile devices to adjust your content for a better display, the media queries, loading them are only able to work, and results in your site being up to date with a mobile application. Check out our documentation for more info on our media.

```
<html class="no-js">  
<html class="no-js">  
</html>
```

Typography and links

Bootstrap will take your design typography and the color. Bootstrap will

- 1. Set the background-color: #fff; at the top.
- 2. Use the `font-family: sans-serif; font-size: 14px; line-height: 1.42857143; color: #333333;`
- 3. Set the `font-size: 14px; color: #333333; text-decoration: none; font-weight: normal;`

These styles can be found within `font-family: sans-serif;`

Normalize.css

To improve cross-browser styling, we use Normalize.css. Check out the documentation for more info: <http://necolas.github.io/normalize.css/>

CSS

Global CSS settings, fundamental HTML elements styled and enhanced with extensible classes, and an advanced grid system.

Overview

Get the lowdown on the key pieces of Bootstrap's infrastructure, including our approach to better, faster, stronger web development.

HTML5 doctype

Bootstrap uses the latest HTML5 elements and CSS properties for a modern, responsive design. You can use the following code to set the doctype.

```
<!doctype html>  
<html lang="en">  
<head>  
</head>  
</html>
```

Mobile first

With Bootstrap 2, we added several mobile-friendly styles for the benefit of the responsive. With Bootstrap 3, we've modified the approach to be more flexible for the user, instead of adding an optional mobile style. You can opt into the mobile style in the Bootstrap 3 mobile first. More details can be found throughout the other docs, or in the separate file.

To ensure proper styling in mobile devices, add the following meta tag to your <head>:

```
<meta name="viewport" content="width=device-width, initial-scale=1">
```

To use mobile styling capabilities in mobile devices by adding your own classes to the default mobile styles. The mobile styling, including icons and data attributes, are available in your own styling system. For more information, check out the documentation on icons and data attributes.

```
<div class="container" style="width: 100%; padding: 0 15px;">  
</div>
```

Typography and links

Bootstrap will take care of styling typography and links. Bootstrap will

- 1. Set the base font-size to 14px, as the body.
- 2. Use the `font-family` to `font-family: sans-serif;` and `font-size` to `14px;` in the `body` class.
- 3. Set the `font-size` to `14px;` and `font-weight` to `normal;` in the `h1` class.

These rules can be found within `font-family` and `font-size`.

Normalize.css

To improve cross-browser styling, we use Normalize.css. For more information, check out the documentation on Normalize.css and the `normalize` class.

More information on Normalize.css and the `normalize` class.

Changelog

2021-03-31 2.0: Created presentation using slides from the original Getting More From Your Mac

Changelog

2021-03-23 1.8: Added how to copy & move files in Finder with key commands; added *Installing Software* section

2020-06-23 1.7: Added section *Get Info, Get Summary Info, & Show Inspector*; add info re: macOS 11 Big Sur; added slide listing all Apple operating systems

2019-08-16 1.6: Added Catalina for 10.15; added note that --- is not an em dash

Changelog

2017-09-20 1.5: Combined naming charts in *History*; fixed minor formatting issues; added Thank You, Scott (⌘⇧/) to *Basic Key Commands*; added Terminal commands for disclosure buttons; added Show the Finder location of a file from a dialog box; added screenshot of Finder sidebar; added command for QuickLook slideshow; added Special Info in Finder; updated Mac prices for 2019; fixed QuickLook slides

Changelog

2018-08-19 1.4: Added *File Info & Actions* section under Finder with Contextual Menus, Get Info, & Inspector; added HoudahSpot under Spotlight; added commands to open all disclosure boxes & Show Details for printing; added *File Management* section with New Folder with Selection; applied Granneman 1.4 theme; fixed minor formatting issues; added Sidebar under Components; more info on built-in security; added ⌘⌘⌘ in addition to triple-click for data detectors

Changelog

2017-09-06 1.3: Fixed formatting; in *History* & added High Sierra; in *Key Commands*, added Alfred for clipboard; added slides re: holding down `⌘` in *Open & Save*; made deleting clearer in *Movement*; added slide about drop shadows in screenshots; added huge amount about Path Finder; added slides re: Finder renaming files; added lots of examples of Spotlight searches (RIP David Bowie); added New File Menu; added `duration:`, `date:`, & much more to Spotlight

Changelog

2016-10-11 1.2: Changed Lazy is Good image; spread Automation throughout the deck; renamed *Things You're Not Doing Right* to *Finder* & added lots more; added *Spotlight* section; changed *menulets* to *status menus*; added *Quick Look*

2016-10-07 1.1: Changed theme; fixed formatting; added & changed a lot; new stuff on Finder, Printing, Key Commands, System Preferences, Tabs; added *Computer Rules* section; lots of fixes

2016-03-13 1.0: First version
