

# Installing, Configuring, & Using Brackets

## A Great Web Development Tool

R. Scott Granneman & Jans Carton

© 2016 R. Scott Granneman

Last updated 2021-03-29

You are free to use this work, with certain restrictions.  
For full licensing information, please see the last slide/page.

# IMPORTANT

Adobe announced on March 1, 2021 that it will no longer develop or support Brackets starting September 1, 2021

Adobe suggests that users move to Visual Studio Code, which I second

For info about VSCode, see [www.granneman.com/all-presentations](http://www.granneman.com/all-presentations) for slides

# Installation

Windows, macOS,  
& Linux

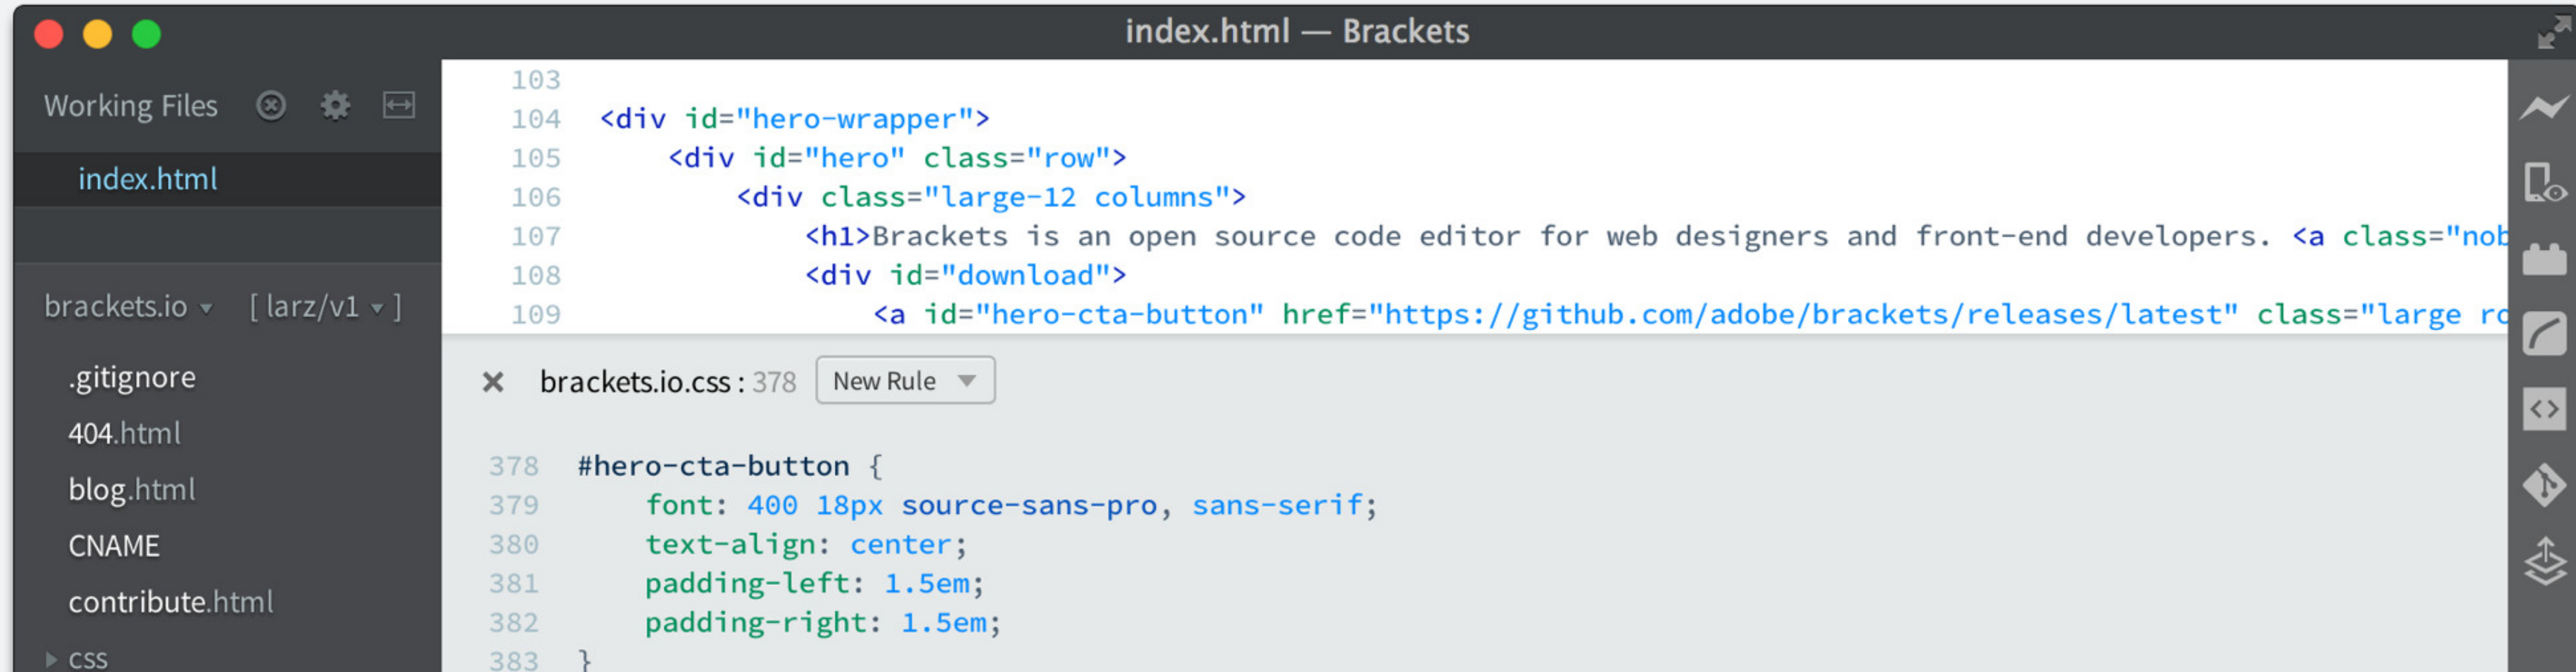

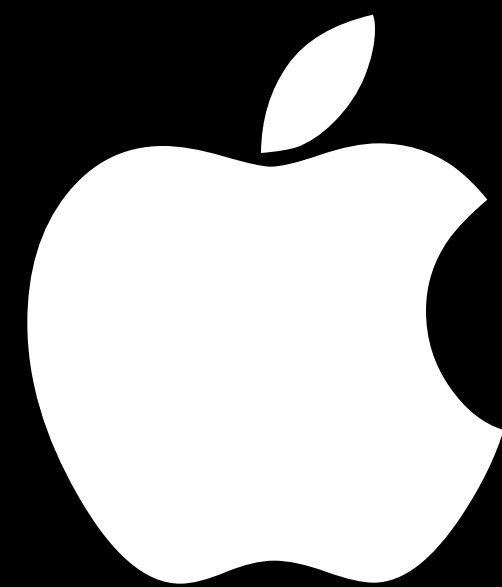

Brackets is available for download at [brackets.io](https://brackets.io)

A modern, open source text editor that  
understands web design.

[Download Brackets 1.7](#)[Other Downloads](#)

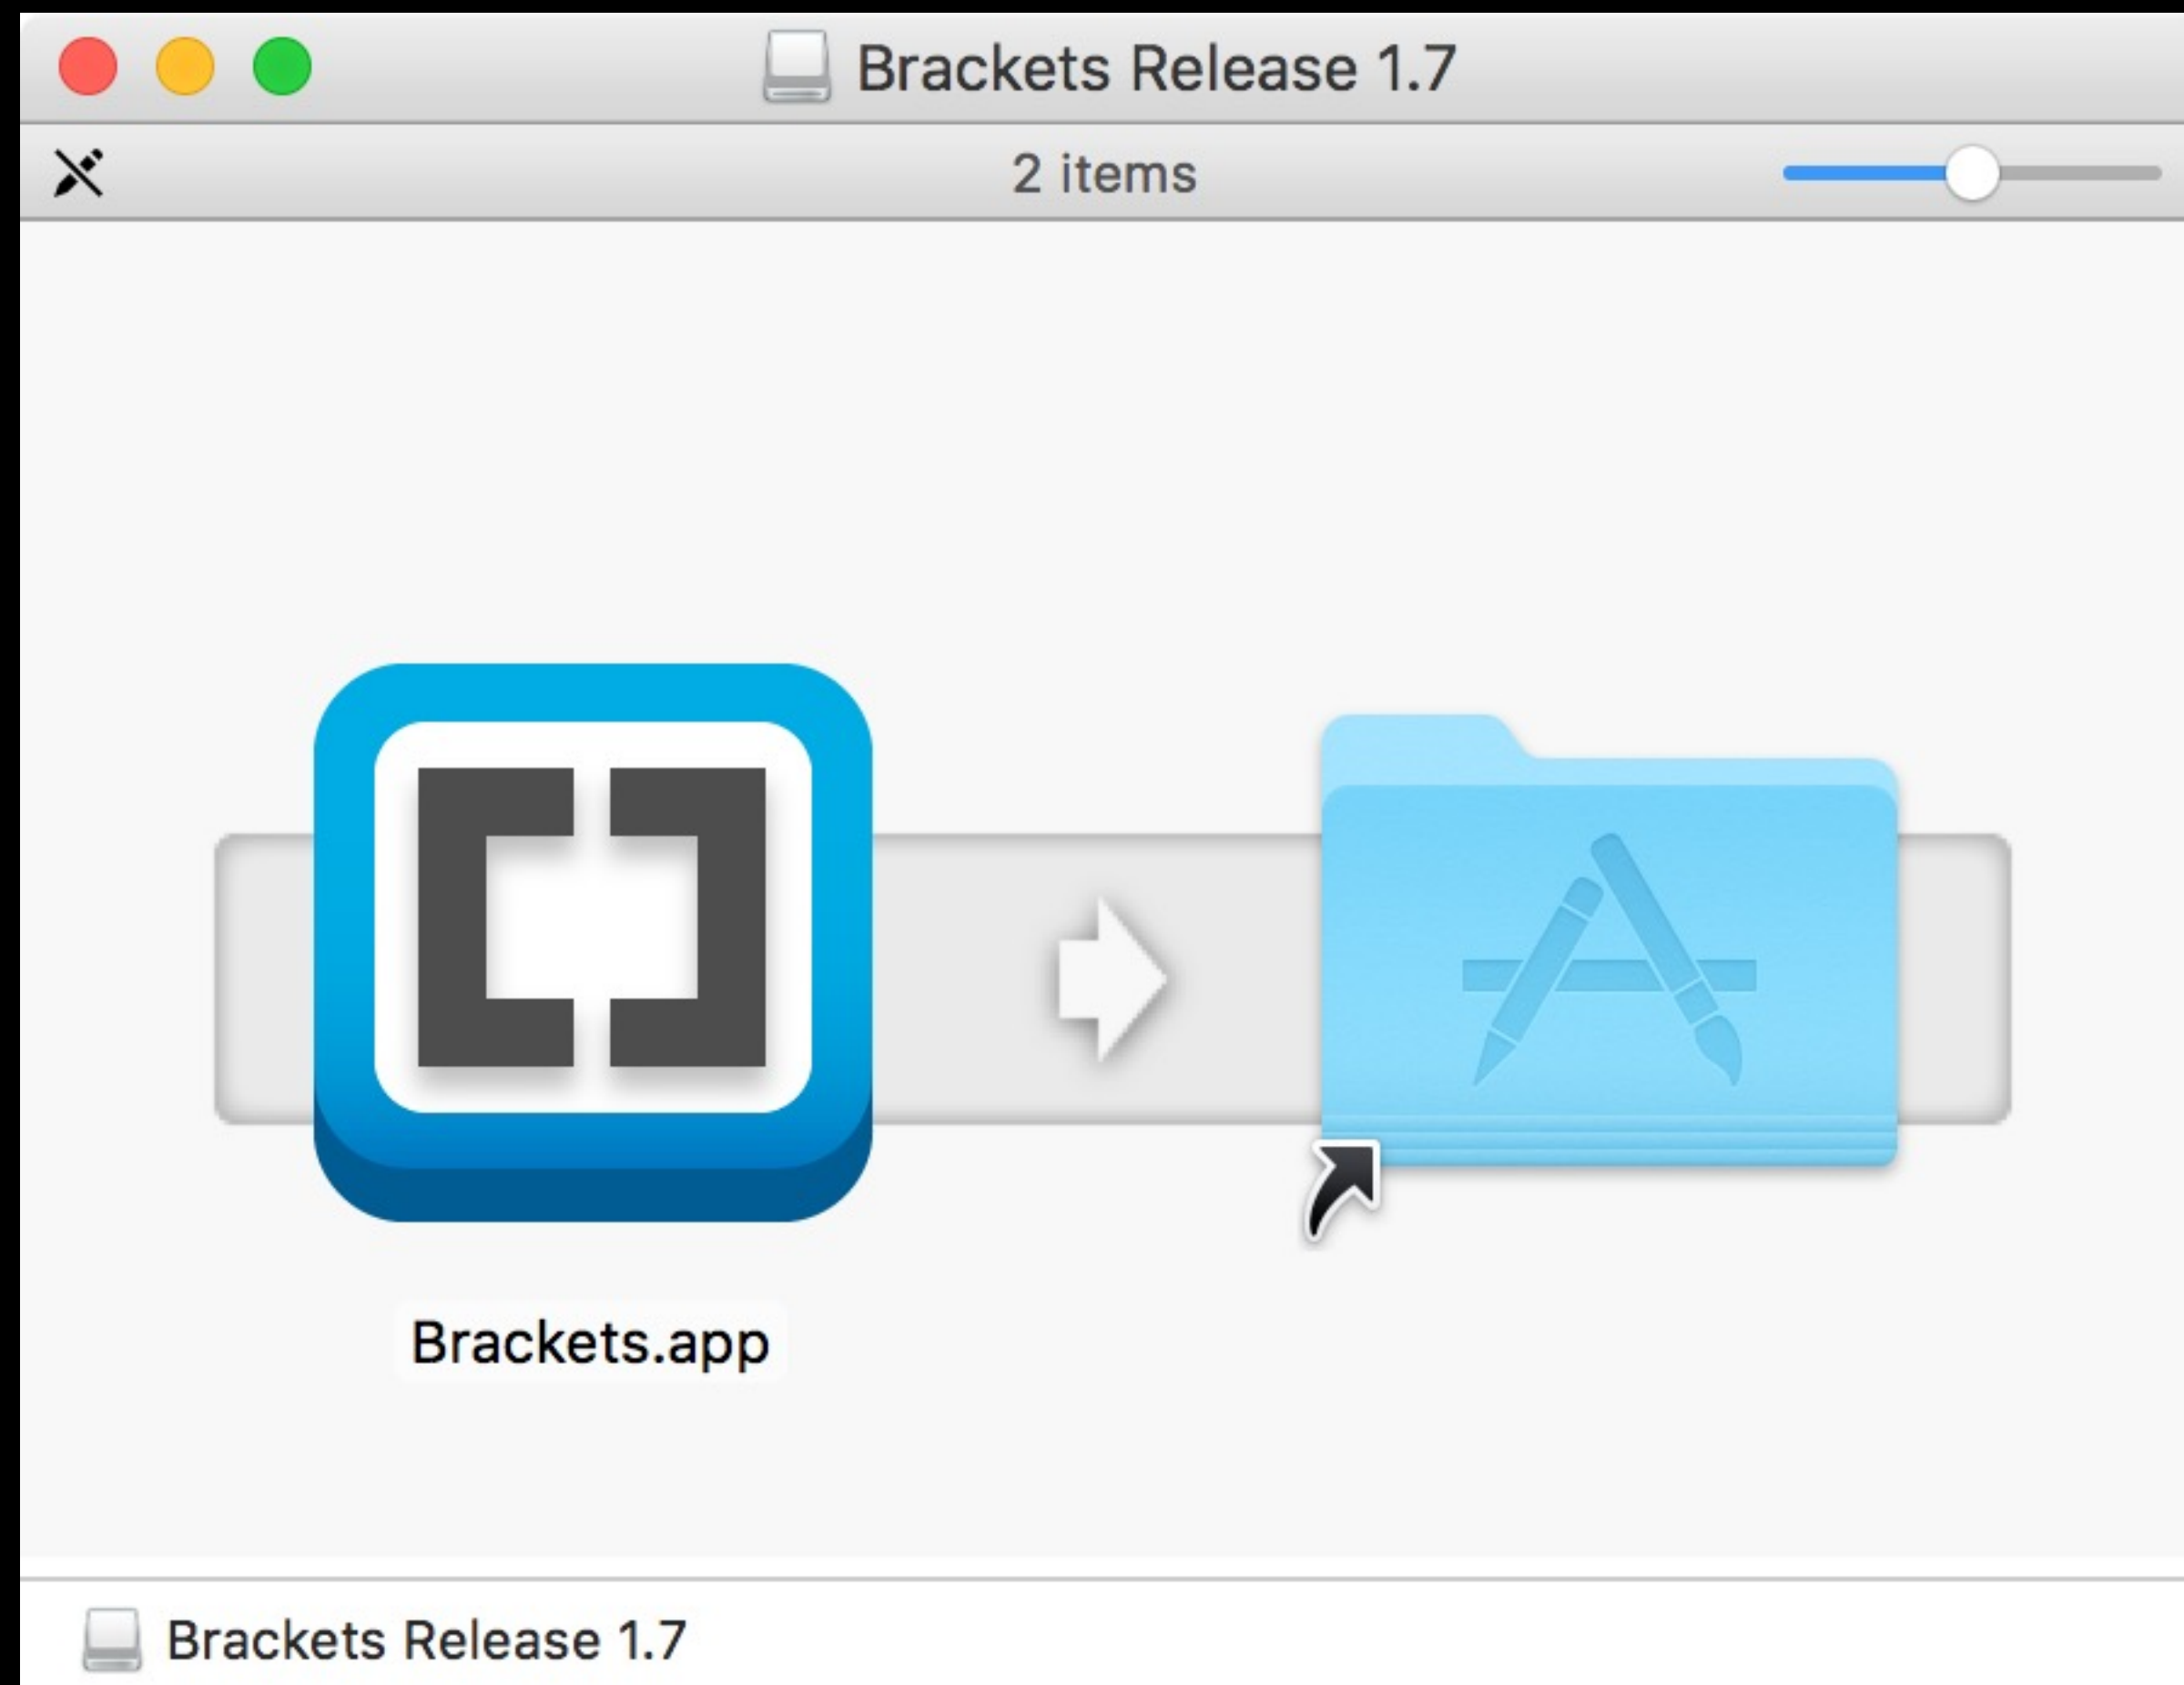

Click this

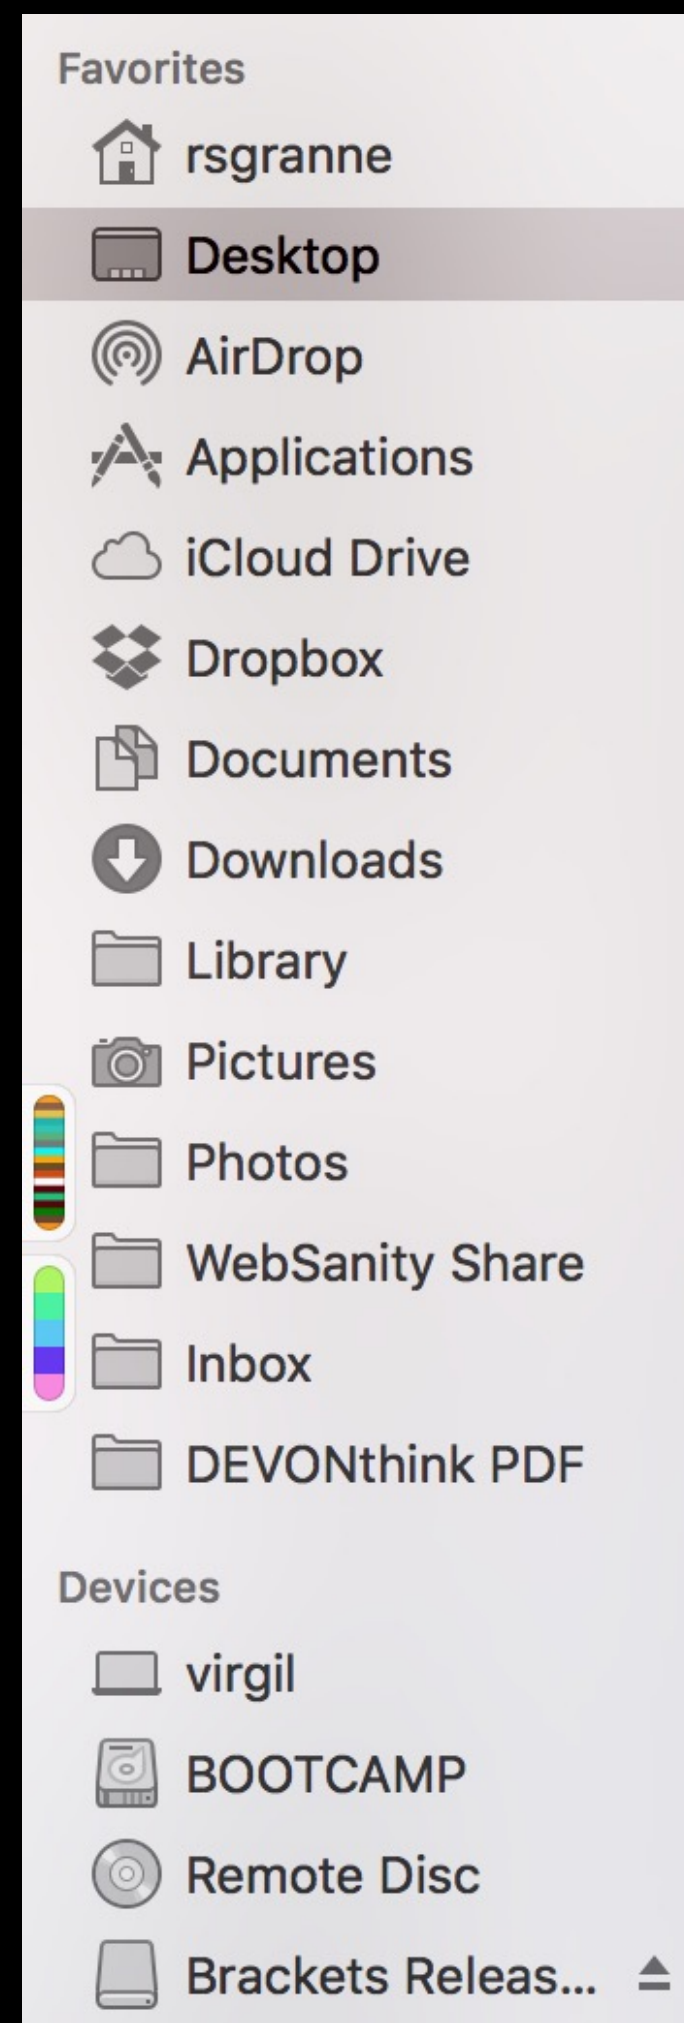

A file named something like  
`Brackets.Release.1.7.dmg` will download

Double-click on the DMG installer & a small window  
should open

Drag Brackets into the Applications folder

Click 🏠 to eject (or right-click on the name & select Eject)

After Brackets finishes copying, eject the DMG installer

Toss the DMG installer into the Trash (select the file & press  )

A file named something like  
`Brackets.Release.1.7.msi` will download

Double-click on the MSI installer

Click Run

Click Next & then Install

If you're asked if you want to “allow the following program to install software on this computer”, click Yes

Click Finish

Toss the MSI installer into the Recycle Bin

HTML Templates, Updated

Scott Granneman

1.3.6 — 02/07/2018

↓ 265

Inserts HTML from a pre-made list of templates.

More info...

Translated into 5 languages, including yours

Installed

Brackets JDK

Adel Wehbi

1.0.1 — 02/07/2018

↓ 189

Integration for Java Development Kit. Compiles and Runs. Includes its own Java Console.

More info...

Translated into 2 languages, including yours

Install

Brackets Link File

José A. Martinez

2.3.1 — 02/06/2018

↓ 54725

New: jsDelivr API 2. Easily link your files (PHP, JavaScript, CSS, images, audio, video, fonts) into the focused document (HTML, PHP, CSS). It allows to copy several files in one time to any project ...

Q indentator

NOTE: These extensions may come from different authors than Brackets itself. Extensions are not reviewed and have full local privileges. Be cautious when installing extensions from an unknown source.

Indentator

[Andrew Huth](#)

1.0.3 — 05/12/2014

Re-indent a document using your current indentation settings.

[More info...](#)

Install

Drag .zip here or [Install from URL...](#)

Close

17

MADE WITH &lt;3 AND JAVASCRIPT

After installation, go to Edit > Indent Document

Better yet, use the key commands!

- » macOS: `^⌘I`
- » Windows: `Ctrl+Alt+I`

Do *not* use Edit > Indent, as that just indents 1 line!

# Configuration

Spaces or Tabs?

A debate has raged for decades: spaces or tabs?

Tabs allow different users to indent at the size they like,  
but can cause problems

Spaces are spaces are spaces — the same for everyone —  
but can cause problems

Pick the one you like (I like spaces)

```

How many spaces? Or, if tabs, how big are they?

2, 4, or 8?

8 & 4 seem too big to me & create nesting that is too deep, so I always choose 2

## view in javascript

```
{ }script.js
45  var push = arr.push;
46
47  var indexOf = arr.indexOf;
48
49  var class2type = {};
50
51  var toString = class2type.toString;
```

I don't like it, but I can preview it

# Other Extensions

# Changing Tags

[Home](#) ► [Web Dev](#) ► [Editors](#) ► [Brackets](#) ► [Extensions](#) ► [Changing Tags](#)

- Developer: Ekaterina Dontsova
- Find Changing Tags on the Brackets Extension Manager
- What it does: Quickly rename elements in matching opening & closing tags
- How to use it: Select the element in an opening tag that you wish to change & enter a new element — & you're finished!

---

If for some reason you don't like Changing Tags, take a look at *Tag Renamer*. It's similar to Changing Tags, but not as smooth to use.

- Developer: 0674272bac (AKA ucym)
- Find Tag Renamer on the Brackets Extension Manager
- What it does: Quickly rename elements in matching opening & closing tags
- How to use it: Press Ctrl+Shift+R (Windows & Mac), enter a new element, & press Enter

## Join Lines

[Home](#) ► [Web Dev](#) ► [Editors](#) ► [Brackets](#) ► [Extensions](#) ► [Join Lines](#)

- Developer: Hamdan Javeed
- Find it on the Brackets Extension Manager
- What it does: “Joins the next line or all the lines selected, with or without whitespace”
- How to use it: Install it & select one of the following menus, or use the associated key commands

Here’s some text that is *not* joined.

```
26 ▼ | | <!--  
27   | | WHAT IS BRACKETS?  
28   | | -->  
29 ▼ | | <p>
```

# Surround Extension

[Home](#) ➤ [Web Dev](#) ➤ [Editors](#) ➤ [Brackets](#) ➤ [Extensions](#) ➤ [Surround](#)

- Developer: Patrick Edelman
- Find it on the Brackets Extension Manager (note that it is called *Brackets Surround*)
- What it does: “...wrap selected text in Brackets”
- How to use it:
  1. Select the text around which you want to insert HTML or characters
  2. Press Ctrl+Shift+J (Windows) or ⌘⌘J (Mac)
  3. Enter HTML tags or characters & press Enter

Some examples:

- `<span>` automatically adds the `</span>`
- `<a href="https://www.granneman.com">` automatically adds the `</a>`

# CSS Class Code Hint Extension

[Home](#) ► [Web Dev](#) ► [Editors](#) ► [Brackets](#) ► [Extensions](#) ► [CSS Class Code Hint](#)

- Developer: growlscript
- Find it on the Brackets Extension Manager (note that it is called *Brackets CSS Class Code Hint*)
- What it does: Automatically detect your CSS classes & IDs & makes it far quicker & easier to enter them in your HTML
- How to use it: Start typing in a class or ID name & Brackets will offer to autocomplete their names

# Installing & Configuring Brackets

## A Great Web Development Tool

R. Scott Granneman & Jans Carton

© 2016 R. Scott Granneman

Last updated 2021-03-29

You are free to use this work, with certain restrictions.

For full licensing information, please see the last slide/page.

# Changelog

2021-03-29 1.2: Added notice that Adobe will no longer support Brackets & suggests moving to Visual Studio Code

2017-11-01 1.1: Switched theme to Granneman 1.4; minor formatting fixes; corrected info re: finding themes; changed subtitle

2017-10-31 1.0: First release
